KITCHEN UPGRADE

Work ethic

Scavolini's latest Diesel Open Workshop collection takes its cue from industrial styling and robust materials such as concrete and wood. This versatile range offers the freedom to mix and match different finishes and textures within the same scheme. Pictured are the Concrete Jersey textured melamine base units with Earth Grey melamine wall units. Prices start from £15,000. (scavolini.com)

A bright notion

Developed by lighting designers Scarlett Hampton and Niki Wright, MatchiMatchi offers lampshades that can be customised and adapted to create unique lighting designs. Choose from a collection of 27 pre-made pendants, or create your own combination using a range of colours, fabrics and finishes. Prices start from £255. (matchimatchi.com)

Slide along

The Chef Control feature on Whirlpool's new range of 6th Sense black-glass induction hobs allows pans to be moved from one cooking zone to another without a change in temperature. The FlexiSide function uses bridging technology to combine the zones to heat bigger pans. Choose from 600mm or 770mm widths. From £449.99. (whirlpool.co.uk)

Effortless attraction

Tubist is a new range of elegant single-lever taps from Abode, available in matt black, polished copper or brushed nickel. The collection includes Tubist Professional, which has a detachable pull-a-round spray with magnetic attachment for simple, secure release and reconnection. Ceramic disc valves aid smooth operation and temperature control. From £179. (abode.eu) >>
